MAIL DATE

DELIVERY MODE

10/05/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/753,860	Applicant(s) CUTTNER ET AL.	
	Examiner Hyun J. Hong	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-33 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-33 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-8, 12, 17, 24, 26, 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellis (US 2003/0146940).

Regarding claim 1, Ellis discloses A method for displaying a media guide to a user, comprising:

receiving information regarding media programs which include: i) programs that are immediately available to the user via download or data streaming ([0043] via internet), and ii) programs that are immediately available to the user via television broadcast (via cable link [0043]), the information including titles of the media programs; and ([0006] Television broadcasts are comprised of streaming data.)

displaying the titles to the user on a single display page. (fig 6)

Regarding claim 4, Ellis discloses The method according to claim 1, wherein available to the user via television broadcast include programs that are available to the user via at least one of: i) satellite broadcast, and ii) cable broadcast ([0006] “cable system headends” “satellite TV distribution”).

Regarding claim 5, Ellis discloses the method according to claim 1, wherein the information includes data which describes content of the media programs, and wherein the method further comprises: comparing the data that describes the content of the media programs to data that describes user preferences, wherein the displaying step includes displaying the titles based on a result of the comparison ([0095]).

Regarding claim 6, Ellis discloses The method according to claim 5, further comprising: receiving the user preferences expressly from the user ([0085]).

Regarding claim 7, Ellis discloses The method according to claim 6, further comprising: determining the user preferences based on a viewing history of the user ([0010]).

Regarding claim 8, Ellis discloses The method according to claim 6, wherein the displaying step includes displaying titles of media programs that do

not meet the user preferences and that meet a promotional priority of a service provider (fig 6 "selectable advertisement, [0066]).

Regarding claim 12, Ellis discloses The method according to claim 1, wherein the media programs further include media programs that are available to the user in the future (fig. 7 *Future times are listed on the media guide*).

Regarding claim 17, Ellis discloses The method according to claim 1, further comprising: in response to the user selecting one of the titles of the media programs, providing a media program via one of download and data streaming ([0006]).

Regarding claim 24, a system, comprising:

A processor (42 control circuitry);

At least one arrangement configured to communicate with the processor via a communications network (fig. 2b, fig. 4);

A computer-readable storing medium (memory 63, [0062]) storing a set of instructions, the set of instructions capable of being executed by the processor to implement a method for displaying a media guide to a user, the set of instructions performing the steps of:

receiving information regarding media programs which include: i) programs that are immediately available to the user via download or data streaming ([0043] via internet), and ii) programs that are immediately available to

Art Unit: 2623

the user via television broadcast (via cable link [0043]), the information including titles of the media programs; and ([0006] Television broadcasts are comprised of streaming data.)

displaying the titles to the user on a single display page. (fig 6)

Regarding claim 26, see the rejection of claim 5.

Regarding claim 29, see the rejection of claim 17.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 16, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (US 2003/0146940) in view of Russ (US 2004/0060063).

Regarding claim 2, Ellis discloses the method according to claim 1.

However, Ellis does not disclose wherein the media programs further include media programs that are stored locally relative to the user.

In analogous art, Russ discloses wherein the media programs further include media programs that are stored locally relative to the user (fig. 12 “recorded programs list”).

It would have been obvious for one skilled in the art to combine the local storage information into the media guide of Ellis. This gives the user more information and allows him to see what programs are stored on his storage device.

Regarding claim 3, Ellis in view of Russ discloses the method according to claim 2, wherein the locally stored media programs include programs that are stored on a personal video recorder (fig. 12 of Russ).

Regarding claim 16, Ellis in view of Russ discloses The method according to claim 1, further comprising: in response to the user selecting one of the titles of the media programs, recording a television broadcast (fig. 5).

Regarding claim 25, see the rejection of claim 2.

Claims 9, 10, 11, 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (US 2003/0146940) in view of Colsey (US 2003/005429).

Regarding claim 9, Ellis discloses the method according to claim 1.

However, Ellis does not teach the method of claim 1 further comprising: in response to the user selecting one of the titles of the media programs, displaying a preview of a media program associated with the selected title.

In analogous art, Colsey discloses in response to the user selecting one of the titles of the media programs, displaying a preview of a media program associated with the selected title ([0026]).

It would have been obvious to combine the previews of Colsey into the media guide of Ellis. This would allow users to quickly determine whether they want to watch a specific program.

Regarding claim 10, Ellis in view of Colsey discloses The method according to claim 9, further comprising: generating the preview based on flags transmitted from a central facility ([0026] of Colsey) *The preview is stored and released by the EPG server.*)

Regarding claim 11, Ellis in view of Colsey discloses The method according to claim 9, further comprising: receiving the preview with the media program associated with the selected title ([0026] of Colsey).

Regarding claim 27, see the rejection of claim 9.

Claims 13, 14, 15, 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (US 2003/0146940) in view of Needham (US 2003/0177495).

Regarding claim 13, Ellis discloses the method according to claim 1.

However, Ellis does not disclose wherein the titles are displayed with a graphical indication of availability of the media programs.

In analogous art, Needham discloses wherein the titles are displayed with a graphical indication of availability of the media programs ([0025] "colors, icons").

It would have been obvious to combine the graphical indication of Needham into the media guide of Ellis. This makes it easier for the user to see the programs that are unavailable/available.

Regarding claim 14, Ellis in view of Needham discloses The method according to claim 13, wherein the graphical indication includes at least one of color shading and an icon ([0025] of Needham).

Regarding claim 15, Ellis in view of Needham discloses The method according to claim 13, wherein the media programs include media programs that are available to the user in the future and programs that are stored locally, and wherein the graphical indication describes whether the media programs are one of immediately available for download or data streaming, immediately available

via television broadcast, stored locally, and available in the future ([0025] of Needham).

Regarding claim 28, see the rejection of claim 14.

Claims 18,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (US 2003/0146940) in view of Schein (US 2003/0005445).

Regarding claim 18, Ellis discloses the method according to claim 1. However , Ellis does not disclose the method according to claim 1, further comprising: in response to the user selecting one of the titles of the media programs, displaying information related to the selected media program, the information includes at least one of actor data, director data and genre data.

In analogous art, Schein discloses the method according to claim 1, further comprising: in response to the user selecting one of the titles of the media programs, displaying information related to the selected media program, the information includes at least one of actor data, director data and genre data (fig. 18E).

It would have been obvious to combine the actor data of Shein into the media guide of Ellis. This enables the user to find out information about his favorite programs.

Regarding claim 19, Ellis in view of Schein discloses The method according to claim 1, further comprising: prompting the user to at least one of pay a cost and wait a time period before viewing a media program (fig. 18c of Schein).

Claims 20-23, 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (US 2003/0146940) in view of Thurston (US 2003/0084450).

Regarding claim 20, Ellis a method of displaying a program guide to a user, comprising:

- b) receiving express user preferences from the user ([0085]);
- d) displaying, on the single page in a second list, titles of at least some media programs that are immediately available to the user and that meet at least one of the user preferences (fig 16a, [0095])

However, Ellis does not disclose a) receiving information from a programming provider that indicated suggested media programs;

- c) displaying, on a single page and in a first list, titles of at least some of the suggested media programs;

In analogous art, Thurston discloses a) receiving information from a programming provider that indicated suggested media programs ([0026]);

- c) displaying, on a single page and in a first list, titles of at least some of the suggested media programs ([0026]);

It would have been obvious to combine the suggested media programs list of Thurston into the media guide and list of Ellis. This allows the user to see a wide variety of programs that may have been skipped because of his user preferences.

Regarding claim 21, Ellis in view of Thurston discloses The method according to claim 20, further comprising: receiving metadata associated with at least some media programs, the metadata including information that describes the media programs, wherein step d) includes comparing the metadata to the express user preferences, and displaying titles of media programs based on the comparison ([0095] of Ellis).

Regarding claim 22, see claim 8.

Regarding claim 23, Ellis in view of Thurston discloses A method of displaying a program guide to a user, comprising:

- receiving user preferences ([0085] of Ellis);
- receiving an indication of a priority of a programming provider ([0026] of Thurston);
- receiving respective metadata associated with available media programs;
- comparing the user preferences to the metadata ([0094] of Ellis); and

displaying a first title of at least one of the available media programs if the respective metadata associated with the at least one of the available media programs matches at least one of the user preferences ([0094] of Ellis); and displaying a second title of at least another of the available media programs based on the priority of the programming provider, even if the respective metadata associated with the at least another of the available media programs does not match at least one of the user preferences ([0026] of Thurston).

Regarding claim 30, see the rejection of claim 20.

Regarding claim 31, see the rejection of claim 21.

Regarding claim 32, see the rejection of claim 8.

Regarding claim 33, see the rejection of claim 23.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hyun J. Hong whose telephone number is (571)-270-1553. The examiner can normally be reached on M-F (9:30a-7:00p).

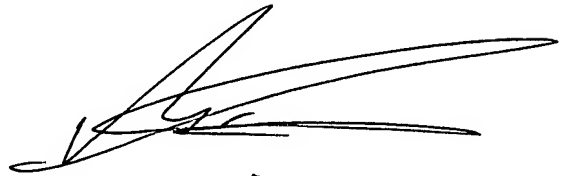

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivek Srivastava can be reached on (571)272-7304. The

Art Unit: 2623

fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
